

A Laysan Albatross is shown in flight, its long wings spread wide, flying over a lush green forested hillside. The bird is white with dark wings and a dark beak. The background is a soft-focus view of a forested hillside under a hazy sky.

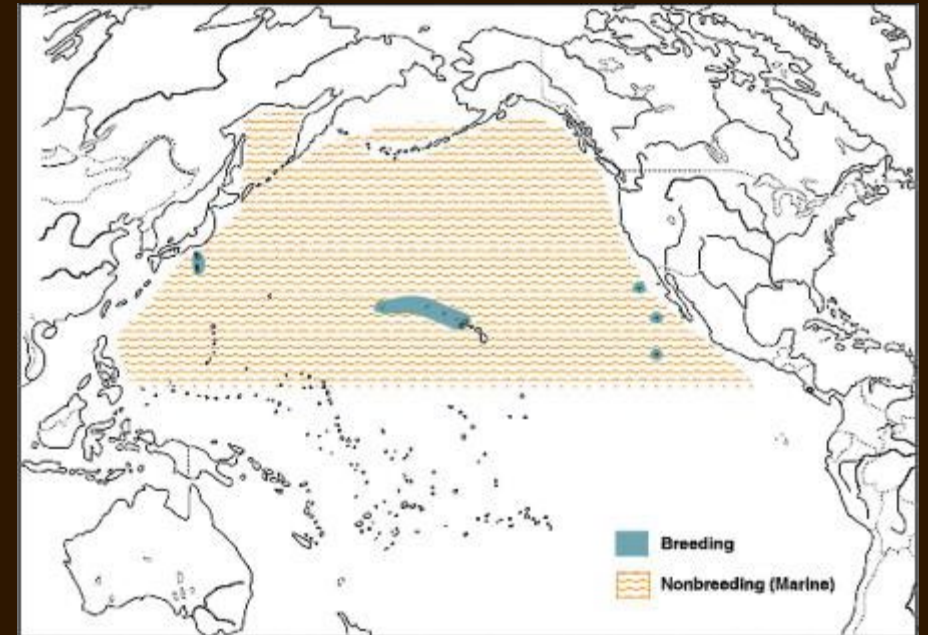

Long-lived seabirds and long-term challenges

Tessa Broholm - Supervisory Wildlife Biologist

USDA Wildlife Services

Kekaha, Kauai, HI

Laysan albatross
Phoebastria immutabilis
MBTA - listed
